

Transitional Living Room Refresh

by The Style Space LLC

Working within a modest budget, this living room refresh focused on creating a brighter, more cohesive space while incorporating the client's existing furnishings and meaningful décor. New layered lighting, a neutral sofa cover, updated textiles, and an area rug helped unify the room, while soft blue and minimal pale-yellow accents brought warmth and continuity throughout. Existing wood and black furnishings were blended with new pieces to create a balanced transitional aesthetic, while family photographs added a personal touch.
